

Take the Strain Out of Loading/Unloading

Specifications

- Rugged aluminum construction
- Patented lift mechanism
- Designed for abuse

The ERG-O-CART eliminates the need to bend while lifting heavy boxes. The unit's patented lift mechanism lowers and raises boxes automatically to the same comfortable level each time. This is a new product. It is ideal for beer, beverage and wine deliveries, and anything else you can think of.

All four boxes are locked in place for transport. After kicking the unlocking mechanism with your foot the boxes automatically raise as they are removed.

Box one at waist level as the box automatically lowers.

Box two at waist level as the two boxes automatically lower.

Box three at waist level as the three boxes automatically lower.
